

SP30 STACKER CONVEYOR

The SP30 is a towable site mobile rigid stacker conveyor. The single axle wheel position can be manually altered to offer multiple radius stock piles. The total weight with the power pack is 1750kg which makes it easily manoeuvrable on site.

A standard SP30 conveyor is supplied with a hydraulic spool functionality to operate the belt on/off and the conveyor up and down. This requires an external 40litre supply.

An option of a Red Rhino "Power Boost" 40 litre diesel engine power pack can be purchased to control the stacker conveyor independently.

STANDARD FEATURES

- 30 ft conveyor length
- 600mm wide chevron belt
- Radial stub axles-manually operated
- 200/60 14.5 Agricultural wheels
- Hydraulic height adjustment – 5 positions
