

# 5000 STATIC ELECTRIC SERIES

## DESCRIPTION

The 5000 static Electric Series is a 500x250 Jaw action crusher. It has a plug in and go electrical input socket requiring 380/415 v power supply and comes with a 5-meter extension supply cable. This is fitted with a 63amp 5 pin power in let socket. Fitted with a control panel complete with sequential crusher and conveyor quick start system. The crusher is driven via a 415/15kw electric motor with full overload protection. The Jaw assembly is fitted with a manual hydraulic jaw adjustment which allows output product sizes from 20mm up to 100mm. A full spec machine will be equipped with a discharge conveyor and vibrating feeder hopper. A base machine will be equipped with a fixed standard hopper and discharge chute. Dust suppression water spray bar with a domestic mains connection can also be supplied. The chassis of the machine has adjustable standing legs for height adjustment. Fork Truck and lashing points are fitted for ease of movement and tie down facility.

## STANDARD FEATURES

- Jaw aperture of 500mm x 250mm
- Electric plug & go power supply
- Hydraulic jaw size manual adjustable
- Height adjustable base legs
- Average product size 20mm to 100mm
- Side access steps
- Approximate output 15-20 tonnes per hour

## DIMENSIONS

- Base feet footprint 1944mm x 1185mm
- Length with discharge conveyor 4495mm
- Length without discharge conveyor 1859mm
- Conveyor discharge height 1400mm
- Loading Height 2261mm – 2015mm
- Weight without conveyor 1645kg/ with conveyor 1890kg
